

COVID-19

In the face of the Covid-19 situation we are updating our customers about ongoing security of supply from Chase Plastics. We recognise this is a difficult and evolving situation and none of us can control external factors however we are committed to supporting your business.

- Chase Plastics is operating with reduced labour on-site and we continue to maintain a normal service to our customers who are operating.
- We have reduced the number of people on-site to ensure that our workers are able to maintain safe social distancing in line with the government requirements.
- We have robust hygiene procedures in our locations, and in line with government instructions we are working from home where possible.
- We have also placed restrictions on HGV drivers' movements when on site for deliveries and collections. Many customers have notified us of their procedures for drivers and these have been communicated to our logistics partners.
- Our investment and development plans will continue as normal.

You can be assured that Chase Plastics remain committed to maintaining the highest standards of quality and service to support our customers at this difficult time.

We hope that you and your families are and will remain fit and well.

Chase Plastics - 14th April 2020
